## S.D – 60 Silicone Defoamer

**S.D 60** is silicone base proprietary product used extensively in a wide variety of industrial batch processing applications. These include petroleum refining, textile processing leather finishing, fermentation processes, oil and antifreeze operations.

S.D 60 is used where foaming creates intense problem especially where aqueous systems are followed. Addition of S.D 60 prevents formation of foam and if foam formed then it eliminates within seconds.

### Technical Information:

Appearance	Milky Emulsion
Chemical Composition	Dimethyl Poly Siloxane
Solids	30 ± 2, or as per requirement
pH	Neutral
Suitable Diluent	Soft Water

### Application:

In jet dyeing machine or for similar processes S.D 60 is recommended in the concentration range of 0.1 to 0.2 gms/litre.

### Handling:

We do not force any ill effect on health, provided the product is used for the purpose it is intended and due attention is paid to the precautions and proactive measures necessary when chemicals are handled.

### Note:

The information presented here is based on our present state of knowledge which we believe to reliance, but we cannot accept any responsibility for operation not under our direct control. It is offered solely for your consideration, innovation and verification.
